

## **StreetTalk VIP at a Glance**

- Pair StreetTalk VIP with your PAC Mate
- Speech or braille output
- Millions of Points of Interest
- Virtual mode lets you explore unknown routes before you commit to taking them
- Use Breadcrumbs to map out original routes and recall later
- Share your routes with others by embossing, beaming or e-mailing

PAC Mate users can enjoy new confidence and have fun while traveling near and far with the **StreetTalk VIP** accessible GPS (Global Positioning Satellite) solution. Take **StreetTalk VIP** for a ride, a walk, vacation, a business trip, to your nearest take-out restaurant, the metro station, or ATM. Paired with a GPS receiver and PAC Mate Omni, **StreetTalk VIP** is a route-savvy travel companion for the visually impaired as well as a real-time exploration guide that provides information in braille or through speech.

**Be the explorer.** With millions of Points of Interest, discover new places to visit. Save turn-by-turn directions to get there by vehicle or as a pedestrian. You might even print, emboss, beam, or e-mail your routes to other users. Switch to Virtual Mode and explore the map as though you were a pedestrian with cross streets, distances, direction and Points of Interest announced as you virtually move around the map – a great way to get familiar with new surroundings before actually venturing out.

**StreetTalk VIP** is essential for long-distance travel and unfamiliar local zones. It also can be a valuable addition to your most routine trips. Set **StreetTalk VIP** to explore routes you commonly take, and let it announce businesses, schools, service locations, and entertainment spots. You might discover some great places you never realized were there!

Create your own routes by dropping “breadcrumbs” as you travel with **StreetTalk VIP**. You can recall the route at any time and travel it in either direction. While you travel, **StreetTalk VIP** announces each maneuver in speech or braille. Check your bearing, speed, distance traveled, and distance to your destination.

**StreetTalk VIP** is a snap to use with intuitive menus as well as shortcut keystrokes to go right to the information you want.

# StreetTalk™ VIP

One country map on disk is included with the **StreetTalk VIP** standalone version. You can purchase a Bluetooth® receiver, Bluetooth card, and maps on a CompactFlash® (CF) card separately. A ready-to-go **StreetTalk VIP** bundle with application, GPS receiver, map disks, and Bluetooth card also is available.

Install **StreetTalk VIP** in your PAC Mate, pop in a CompactFlash (CF) card containing your maps, and you're off. **StreetTalk VIP** can be used with a choice of many popular Bluetooth GPS receivers. With Bluetooth, the receiver can be placed up to 30 feet from the user – on a window sill, the rear deck of a car, or even on a guide dog harness – so you aren't tethered to a lot of cables or special straps.

Owners of a PAC Mate 4.1 or earlier will need to update to PAC Mate Omni to work with **StreetTalk VIP**. If you purchased your PAC Mate on or after July 1, 2007, your upgrade to PAC Mate Omni is FREE. See our Web site for pricing details: [www.FreedomScientific.com/products/fs/streettalk-gps-product-page.asp](http://www.FreedomScientific.com/products/fs/streettalk-gps-product-page.asp).

**StreetTalk VIP** is an aid to orientation. It is not intended as a substitute for standard mobility aids such as a cane, sighted companion, or guide dog. Please observe ordinary caution when walking, especially when vehicles are present.
